Summary

Motivated Python and Web Developer with hands-on experience building real-world applications using Flask. Skilled in both frontend and backend development, including authentication systems and REST APIs. Focused on creating practical solutions and continuously improving technical skills. Seeking an internship to contribute to impactful engineering projects and grow as a professional developer.

Skills

Programming Languages	Python, C, Java (Basic)
Web Development	HTML5, CSS3, Bootstrap, Flask
Backend	REST APIs, Authentication Systems, OTP Verification
Tools & Version Control	Git, GitHub

Projects

OTP Verification System – Flask, Python, HTML/CSS/Bootstrap

2025

- Engineered a secure OTP-based authentication system using Flask, implementing time-limited token generation and real-time server-side validation.
- Designed a fully responsive user interface with HTML, CSS, and Bootstrap, ensuring cross-device compatibility.
- Integrated backend validation logic to prevent replay attacks and enforce session-based OTP expiry.
- GitHub:** [View Project](#)

QR Code Generator – Python

2025

- Built a Python application to dynamically generate QR codes for URLs, text, and GitHub repository links using the qrcode library.
- Implemented configurable error-correction levels and image-size parameters for flexible output.
- Delivered a clean, minimal interface improving usability for non-technical users.
- GitHub:** [View Project](#)

Education

Bachelor of Technology – Computer Science & Engineering

2024 - Present

ITS Engineering College, Greater Noida

Achievements

- Participated in **Smart India Hackathon (SIH)** – applied Python skills to real-world problem-solving under competition constraints; received official participation certificate.
- Achieved **4 rating in Python** on HackerRank, placing in the top tier of skill-assessed developers on the platform.
- Delivered multiple end-to-end Python projects independently, including a production-grade authentication system and a utility tool suite.

Certifications

- Python (4)** – HackerRank Skill Certification
- Smart India Hackathon (SIH)** – Participation Certificate

Strengths

- Rapid learner with a track record of adopting new technologies independently
- Strong analytical and problem-solving mindset applied across academic and personal projects
- Self-driven with consistent, autonomous project delivery from ideation to deployment
- Solid foundation in Python and modern web development best practices
